

Masterpiece™ Wind Load

Perfect Combination of Looks and Strength

The flagship of the Raynor Traditions Series, Raynor Masterpiece steel garage doors feature 2" thick sections, a continuous thermal break between sections, and expanded polystyrene insulation bonded between two steel skins for an outstanding 10.25 R-value. Masterpiece features the EnduraCote™ hardware system. Masterpiece doors are available in post, u-bar and strut design.

Insulation

Masterpiece 2" thick sections feature a core of polystyrene insulation pressure bonded between two high-strength, impact-resistant steel skins, resulting in an impressive R-Value of 10.25.

EnduraCote™ Hardware System

The EnduraCote Hardware System comes with extended-life springs, powder coated track and hardware that provides a clean, finished look, and maximum protection against rust.

Thermal Protection

A vinyl joint seal prevents airflow between sections, while a mechanically interlocked vinyl thermal break prevents heat loss and eliminates metal to metal contact between hot and cold surfaces, allowing the insulation to be fully effective.

Raynor Secure

Masterpiece doors are available in a wide variety of pressure ratings to meet your local wind codes.

Colors

Standard

*Features the Kynar® paint process, which provides extended UV protection against fading.

Optional

Raynor's OptiFinish paint process allows your Masterpiece door to be customized with more than 1,800 Sherwin-Williams™ colors.

Decorative Hardware

The black matte powder coated straps and handles are designed to appear hand-forged, adding a historically-accurate dimensional quality to your door. Choose from handles and straps with Bean or Fleur-de-Lis designs.
