Sectional Rail and Stile Doors

AlumaView® doors have long been the standard fixture for facilities that require dependable, attractive doors that offer maximum visibility. The extruded aluminum frame can be finished with a choice of anodizing or ArmorBrite™ powder coat. AlumaView door sections are a full 1 3/4", 2", or 3” thick.

**AlumaView AV300**
This 3” thick AV300 is the sturdiest door in the AlumaView family. The AV300 adds increased strength for unparalleled durability, as well as unmatched aesthetics, with the incorporation of U-Bar trussing built into the rails (only required in doors wider than 18’2”) to maximize visibility without any obstructions.

**AlumaView AV200**
Designed for peak performance and strength, this 2” thick door is available in larger sizes and features bold rail construction for maximum durability, reliability and beauty.

**AlumaView AV175**
This benchmark product provides Raynor reliability and durability to meet or exceed the requirements of daily use. With 1 3/4” thick door sections and streamlined rail construction, this door is engineered for lasting beauty and durability.
AlumaView®

Every AlumaView door is built for superior performance and includes the features listed below. Additional options and upgrades are also available.

**Years of Durability**
Door sections are clear-anodized for maximum durability. The AV175 is designed to withstand minimum wind loads of 15 p.s.f., while the AV200 and AV300 can withstand minimum wind loads of 20 p.s.f.

**Rugged Hardware and Springs**
Your AlumaView door comes packaged with the right combination of hardware, track and springs to match your door’s size and application.

**Decreased Energy Costs**
AlumaView doors help you reduce energy costs with a U-shaped, vinyl bottom weatherseal secured by a sturdy aluminum retainer.

### Construction

**Snap-in Retainer**
AlumaView panels and glass are sealed and held in place with a snap-in retainer. Clear anodized, RAL9003, RAL 9016 and standard white doors use gray snap-ins. All other doors use black snap-ins.

**Integral U-Bar**
Factory installed integral U-Bar construction within the rails of the AV300 creates added strength to the section panels and provides for a clean look on the interior of the door by removing trussing obstructions from visible areas (only required in doors wider than 18’2”).

### Energy Saving Options

**Header Seal**
Flexible vinyl flap header seal reduces air infiltration and energy costs by sealing the top of the door against the header.

**Jamb Seal**
EPDM rubber jamb seal also helps to reduce air infiltration and decrease energy costs by sealing the side of the door when closed.
**Finish Options**

**Choice of Windows**
For maximum design flexibility, choose from tempered, tinted, double-strength, insulated, acrylic, polycarbonate or impact resistant glass in a variety of thicknesses.

**EnduraCote™**
The EnduraCote hardware system comes with springs, track and hardware that are powder coated to provide a clean, finished look and maximum protection against rust.

**188 ArmorBrite™ Colors**
Choose your color! AlumaView door rails and stiles can be powder coated in any of 188 colors for an attractive appearance and exceptional durability.

**Anodized Finishes**
Choose from six custom anodize finishes including champagne, light bronze, medium bronze, dark bronze, extra dark bronze, or black.

**IECC Requirements Package/California Title 24**
The International Energy Conservation Code (IECC) requires building components to meet minimum Air Infiltration rates. This option will ensure the AV300 and AV200 will exceed the latest IECC and Title 24 standards for air infiltration (only), by using the required header and jamb seals and track mounting. Exhaust ports and pass doors cannot be used. Raynor’s IECC package yields the following results.

**Model Options and Upgrades**

**Aluminum Panels**
For busy work environments and to prevent glass breakage, aluminum panels protect your investment. Choose from impact resistant and insulated panels as well.

**High-cycle**
For reliable operation in high traffic areas, choose high-cycle torsion springs with 25,000, 50,000, or 100,000-cycle life. For reduced maintenance and ultra-smooth operation in heavy-use applications, choose a weight counterbalance system.

**Locks**
In applications where control and access are important, choose from a variety of locking options to help keep your building secure. Locks come in both inside and outside variations.

**Carbon Monoxide Vent**
Allows you to channel fumes to the outside when the door is closed. Available in a variety of sizes.

**Pedestrian Doors**
Pedestrian doors are designed for convenient entry and to help minimize energy loss. Pedestrian doors are available on the AV200.

**Customized Track**
Track systems are supplied to fit special clearances, inclines or contour applications. Hardware and track systems can be customized to fit any need. Additional trussing is available for special wind loading applications.

*Some options may be limited to door size or model.*

**Commercial Sectional**
Commercial Operators

Commercial Operators
Raynor ControlHoist™ (with solid state logic board control) operators are available in a variety of motor, voltage, and phase combinations for any commercial or industrial application. Contact your local Raynor Authorized Dealer to select the operator and accessories that are suited for your door’s size and usage.

Control Options
A variety of control stations, photoelectric eyes and remote activation devices are available.

Professional Installation and Service

Depend on your Raynor Dealer

When you select Raynor, you’re not just getting a superior garage door - you’re also getting professional garage door installation and service expertise.

Every Raynor garage door is installed by a trained Raynor professional. And that means added benefits for you. First, you won’t have to deal with it yourself. And because it’s done right the first time, your door will deliver performance and reliability from the day it’s installed. Your technician will check your door for everything from safety to performance and appearance. Trust your Raynor garage door to someone who knows it better than anyone else, your professional Raynor Dealer.
