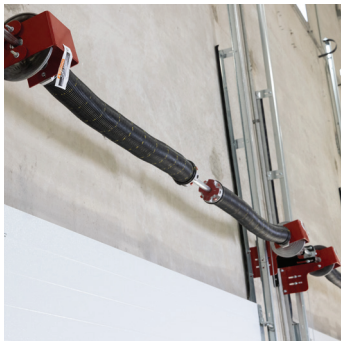
RAYNOR GARAGE DOORS

QUICKDOCK™ SOLUTION

From installation to maintenance and security, Raynor's new patent pending QuickDock door reimagines dock doors with the customer in mind. Raynor has engineered a solution to make the entire process **safer**, **faster** and **easier** while also providing **security** and **reduced air infiltration**. This industry leading design makes QuickDock the new dock door standard.

AVAILABILITY

Models	**QuickDock is an option that can be added to any of the below models.**	
	S20 S24 S24C	EC200 TM200
Door Sizes	**Width**	**Height**
	8'-2" 9'-2" 10'-2"	8' 9' 10'
Colors	White	
Track	2" and 3" options	
Springs	up to 25,000 cycles	
Quantity	36 door minimum order	
Warranty	10 years (Rust-through & delamination)	



INCREASED SAFETY

A counterbalance assembly mounted 16" above the header, and a one-piece track system anchored at a reduced height, increase safety by eliminating the need to lift the assembly 22 feet in the air.

DECREASED DOWNTIME

The sections, counterbalance assembly and track all come pre-assembled and palletized with QuickDock. This, as well as fewer parts overall, allows for faster and easier installation, maintenance and service, meaning less downtime for the customer.

DECREASED AIR INFILTRATION

A newly designed interior lock secures the door in place while Raynor's innovative windlock cleat keeps the door tight to the jamb for reduced air infiltration.
