

# QUICKDOCK™ SOLUTION

From installation to maintenance and security, Raynor's new patent pending QuickDock door reimagines dock doors with the customer in mind. Raynor has engineered a solution to make the entire process **safer, faster** and **easier** while also providing **security** and **reduced air infiltration**. This industry leading design makes QuickDock the new dock door standard.

## INCREASED SAFETY

A counterbalance assembly mounted 16" above the header, and a one-piece track system anchored at a reduced height, increase safety by eliminating the need to lift the assembly 22 feet in the air.

## DECREASED DOWNTIME

The sections, counterbalance assembly and track all come pre-assembled and palletized with QuickDock. This, as well as fewer parts overall, allows for faster and easier installation, maintenance and service, meaning less downtime for the customer.

## DECREASED AIR INFILTRATION

A newly designed interior lock secures the door in place while Raynor's innovative windlock cleat keeps the door tight to the jamb for reduced air infiltration.

### AVAILABILITY

<b>QuickDock is an option that can be added to any of the below models.</b>		
<b>Models</b>	S20	EC200
	S24	EC224
	S24C	TM200
<b>Door Sizes</b>	<b>Width</b>	<b>Height</b>
	8'-2"	8'
	9'-2"	9'
		10'
<b>Colors</b>	White	
<b>Track</b>	2" and 3" options	
<b>Springs</b>	Standard: up to 25,000 cycles Optional: 50,000 cycles	
<b>Quantity</b>	36 door minimum order	
<b>Warranty</b>	10 years (Rust-through & delamination)	
<b>Pairing Options</b>	Operators, Coil Cords, Sensing Devices
